

De Leon, Christian Valenzuela

deleon.c.bscs@gmail.com / +63 (921) 564-1028 / <https://ksandeleon.me>
Marikina, Philippines / [linkedin.com/in/ksandeleon](https://www.linkedin.com/in/ksandeleon)

Professional Summary

Fullstack web developer focused primarily on Python, PHP, Typescript, and applied AI. Dedicated on building scalable and secure systems. Eager to contribute my expertise and problem solving skills to real-world challenges in Software Engineering and Artificial Intelligence.

Technical Skills

- HTML, CSS, JavaScript, Flutter, Dart, Bootstrap, Tailwind
- Laravel, PHP, Python, Flask, Curl, Postman
- Tensorflow, Pytorch, Scikitlearn, Matplotlib, Seaborn
- CompTIA A+, Technical Support, Operating Systems, Networking
- Visual Studio Code, Jupyter Notebook, Scripting, Shell
- MySQL, SQLite, Firebase, Google Cloud API

Research Interests

Computer Vision, Multimodal & Hybrid Architectures, Segmentation, Transformer, System Design, Medical Image Analysis, Applied Deep Learning

Professional Experience

Technical Student Assistant of the Executive Vice President of EARIST

1 July 2025 – 1 February 2026
Nagtahan St, Sampaloc, Manila, 1008 Metro Manila, Philippines

- **QR-Based Property Management System** *September 2025 - January 2026*
Frontend and Backend Developer, PHP Laravel, Javascript React, MySQL
 - Streamlined the lifecycle tracking of 1000+ physical assets by architecting an end-to-end property management workflow from procurement to disposal.
 - Reduced manual asset processing time by 70% by integrating QR code scanning for instant verification of borrowing, returns, and maintenance logs.
 - Secured sensitive system data across 9 administrative departments by engineering a strict role-based access control (RBAC) system.
 - Improved administrative reporting efficiency by 30% by building a comprehensive analytics dashboard with custom data exporting capabilities.
- **EARIST Alumni Connect Portal** *July 2025 - January 2026*
Backend Developer, PHP Laravel, Bash Scripting, MySQL
 - Centralized records for 500+ graduates by engineering a scalable MySQL database based on comprehensive stakeholder feature-definition interviews.
 - Increased graduate engagement tracking by 25% by programming a Laravel-based survey management system with automated analytics.
 - Validated 20+ API endpoints through systematic testing, ensuring accurate data retrieval and seamless communication between the frontend and the MySQL database.
 - Secured project approval from 6 university stakeholders by successfully presenting and translating complex backend architecture into actionable business value.

Leadership & Projects

Real-Time Thermal Burn Severity Classifier

August 2025 - January 2026

Web and AI Developer, Flask, Pytorch, Tensorflow, YOLOv11, Hybrid Model, Computer Vision

- Boosted pixel-level segmentation accuracy by 15% across 5 severity classes by engineering a custom Multimodal YOLOv11 model, transitioning from a baseline CNN-Transformer hybrid.
- Processed a dataset of 9,000+ clinical images through rigorous preprocessing and hyperparameter fine-tuning to optimize real-time inference speed.
- Optimized a Flask AI inference API for a resource-constrained cloud environment, successfully delivering diagnostic results to the frontend Progressive Web App (PWA) in under 2 seconds.
- Enhanced patient first-aid response times by programming a systematized medical guidance feature that translates complex vision analysis into instant, actionable recommendations.

The V8be Programming Language

February 2024 - July 2024

Lead Developer, Python, OOP, Design Patterns, Lexical Analysis

- Engineered an esoteric programming language from scratch, systematically parsing 10+ unique syntax rules into executable tokens using a custom lexical analyzer.
- Enabled dynamic syntax evaluation and seamless runtime execution by implementing the Visitor Design Pattern to traverse Abstract Syntax Trees (AST)

Training & Certifications

AWS Training & Certification

AWS Artificial Intelligence Practitioner
AWS Educate - Machine Learning Foundation
Responsible Artificial Intelligence Practices
Security, Compliance, and Governance for AI Solutions

CompTIA Certification & Skills Progression Partnership Program (SKiPP)

CompTIA A+ ce Certification
Infosys SKIPP & Service Desk Foundation (ITIL® 4)
Asia Pacific College CompTIA A+ Training Program

Educational Attainment

Bachelor of Science in Computer Science,

2022 - 2026

Eulogio “Amang” Rodriguez Institute of Science and Technology

TVL - ICT Computer Programming,

2020 – 2022

Gardner College Cainta
